CURVE recessed

MOUNTING INSTRUCTIONS

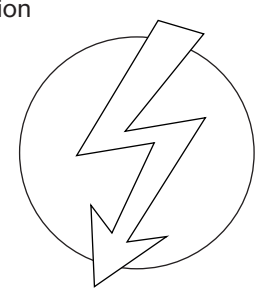
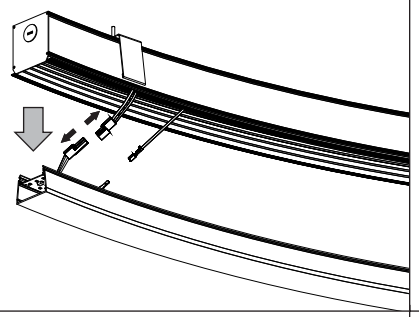
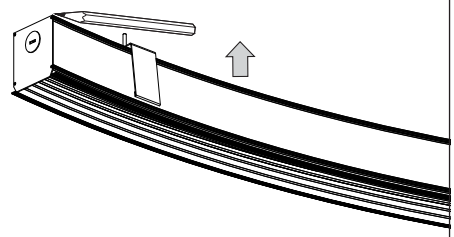
Turn OFF power source before installation



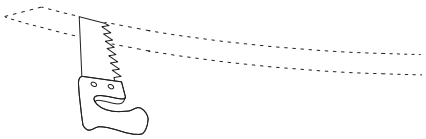
1. Remove inset/lens from channel



2. Place channel in desired position on ceiling and mark or score the fixture position

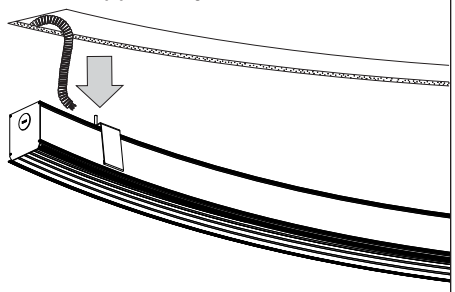


3. Cut out hole in ceiling

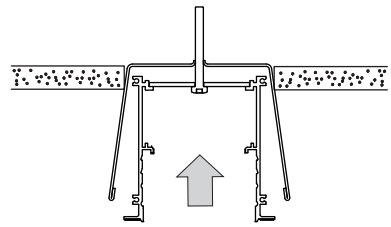


WARNING: Please note it's not recommended to make a ceiling cutout in the absence of the light fixture or a template

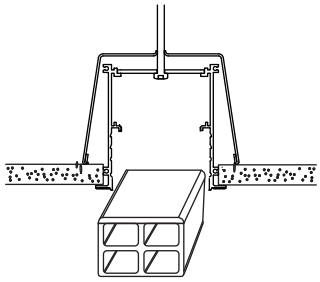
4. Thread conduit through top of channel (conduit supplied by others)



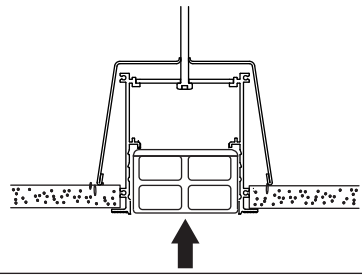
5. Insert channel to blocks through drywall



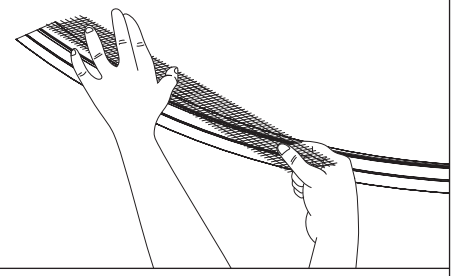
5. Use spacer block to maintain channel width



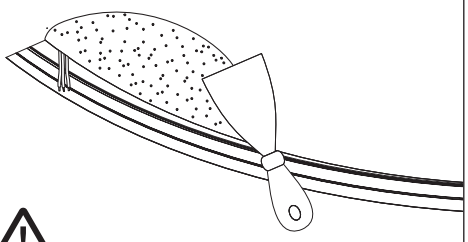
6. Secure the spacer blocks to the chanel



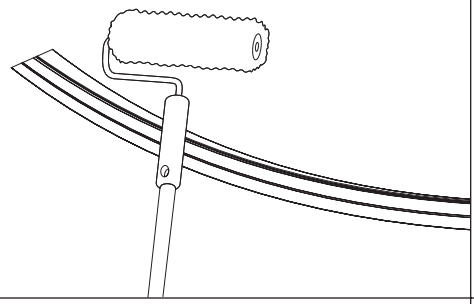
7. Apply drywall mesh tape between the channel and the drywall. Repeat for each additional channel



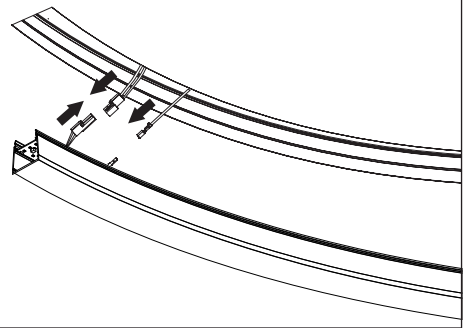
8. Cover gaps and flange with splange



9. Once dry, paint over spackle

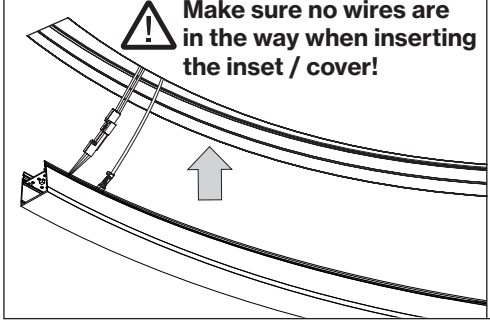


10. Make connections

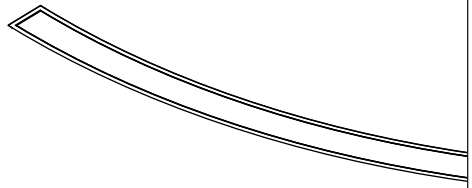


11. Insert inset into channel

Make sure no wires are in the way when inserting the inset / cover!



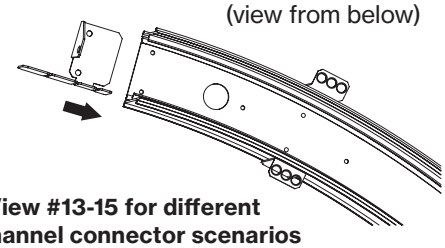
12. Cover should be flush with channel. Installation complete



Should hear “click” once secure.

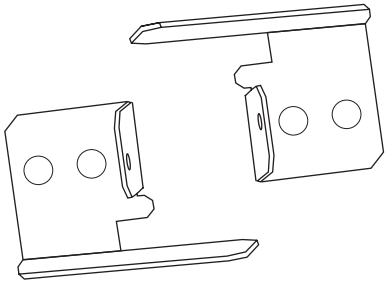
13. **SYSTEMS**: Slide connectors into channels

(view from below)

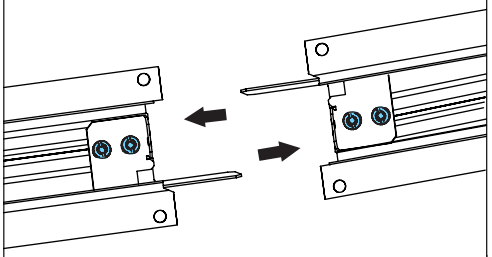


***View #13-15 for different channel connector scenarios**

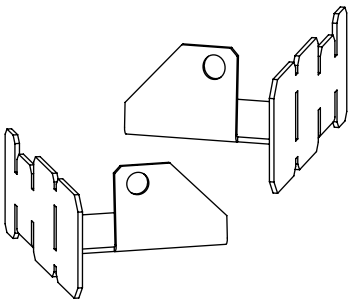
14. **Connection Type:** Straight <> Straight



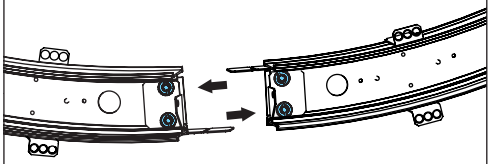
14a. **SYSTEMS**: Use screws to secure connectors to channels



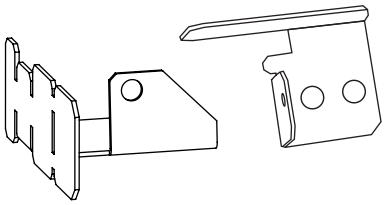
15. **Connection Type**: Curve <> Curve



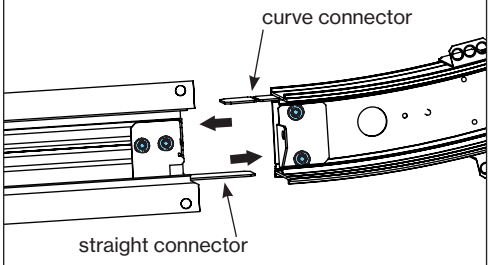
15a. **SYSTEMS**: Use screws to secure connectors to channels



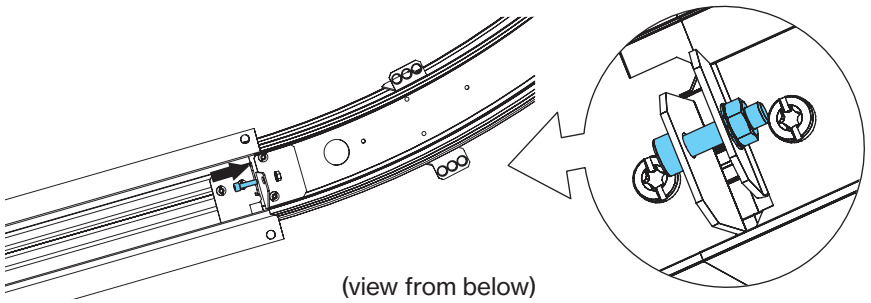
16. **Connection Type:** Straight <> Curve



16a. **Connection Type:** Straight <> Curve

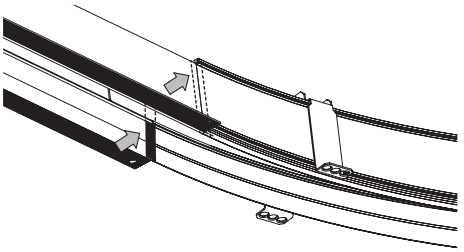


17. **SYSTEMS**: Use screw and nut to secure connectors to channels

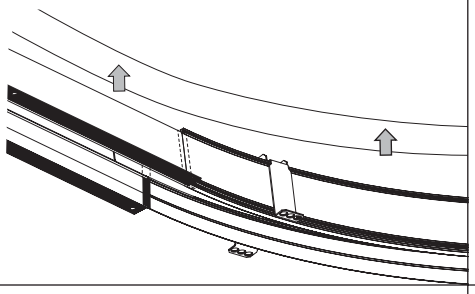


(view from below)

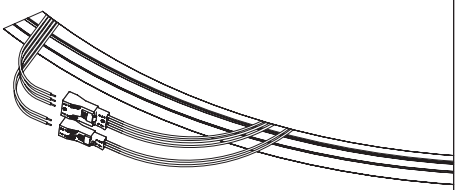
18. **SYSTEMS**: Apply aluminum tape to the interior of the channels (where channels meet)



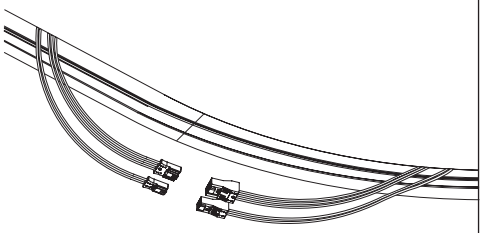
19. **SYSTEMS**: Insert channels into cutout hole



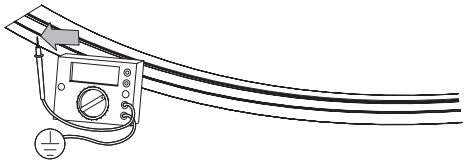
20.**SYSTEMS**: Establish connection between segments. Repeat steps for multiple channels



21. **SYSTEMS**: Establish connection between segments. Repeat steps for multiple channels

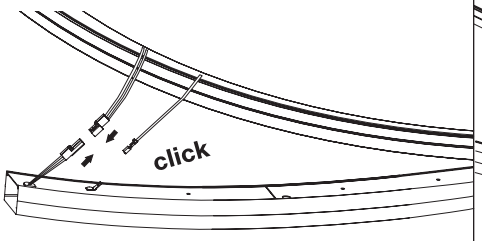


22. Testing the current

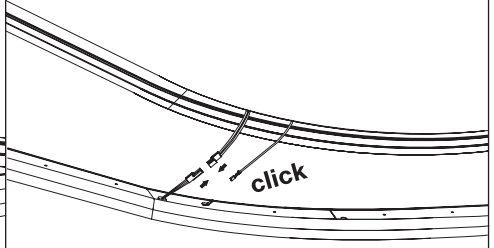


Max. 0.5 Ohm resistance

23. **SYSTEMS**: Connect inset(s) wiring, grounding clip and fall protection to channel(s)

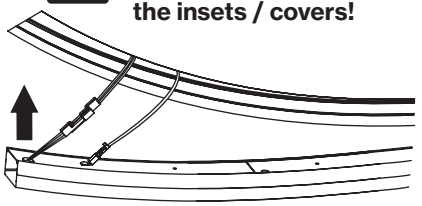


24. **SYSTEMS**: Make connection between segments



25. **SYSTEMS**: Insert insets / covers into channels

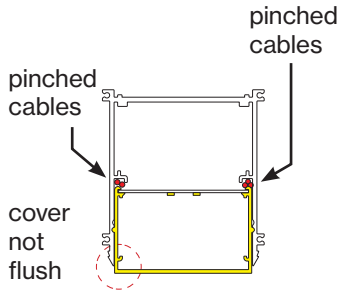
Make sure no wires are in the way when inserting the insets / covers!



26. **SYSTEMS**: Installation complete

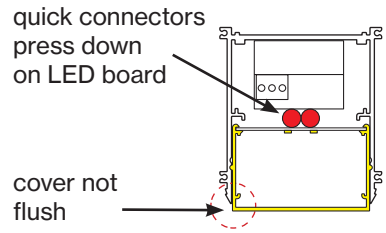
IMPORTANT: Cover must sit flush. If cover does not sit flush and is not fully engaged, it might fall. Due to changes in temperature, the acrylic can slightly shrink and expand. As long as they are installed correctly, the lighting fixtures are designed to accommodate those physical changes.

WRONG

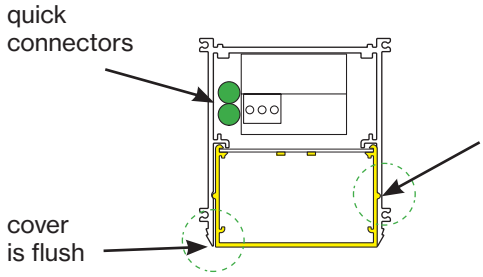


IMPORTANT: Quick connectors must be tucked in between drivers and open space in the fixture. Make sure quick connectors don't rest on the LED board.

WRONG

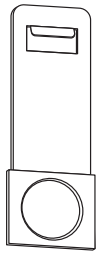


RIGHT

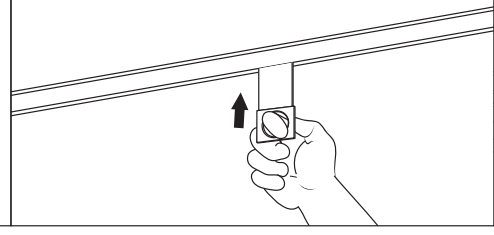


Cover must be fully engaged. You will feel a physical feedback and hear a "click" noise to confirm that the cover is engaged.

LENS REMOVAL TOOL: Provided in the packaging by BASO



1. Insert the tool between the lens and the housing of the fixture with the hook facing the lens



2. Remove lens slowly by pulling down on the fixture

EN **Installation, commissioning and maintenance may only be performed by authorized and qualified personnel, taking into consideration these installation instructions and any standards and regulations applicable to the respective area of application.The electrical, mechanical and thermal suitability of the luminaire for the intended area of application must be ensured and the secure fastening of the luminaire after its installation must be controlled. Turn off supply voltage before replacing any lamps (if applicable) as well as before performing any other works on the luminaire (e.g. cleaning) and wait until luminaire and lamp have completely cooled off. Please refer to the installation notes of the lamp manufacturer when inserting, replacing and operating conventional lamps. Use a soft, damp cloth to clean the luminaire. To clean plastic components and reflectors, a standard pH neutral, alcohol-free, non-abrasive cleaning agent may also be used.**

Keep these installation instructions in a safe place as reference for any future maintenance works.

1. The lamp is not suitable for outdoor use.
2. The lamp may only be used with a safety guard.
3. Damaged protection glasses and covers have to be replaced immediately.
4. Corrosive chemical products must not be used as this may have a detrimental effect on the luminaire.
5. No liability is accepted for any subsequent change of the luminaire.
6. LEDs are high-quality electronic components! Please avoid touching by hand the LED light emitting surface while assembling or replacing parts and during maintenance work.
7. To avoid damage of the profile, unevenness on the wall or ceiling must be leveled out before assembling the profiles. While assembling the profiles, make sure they do not deform in order to guarantee their proper function.
8. The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.
9. The LED circuit must always be closed, before the converter is connected to the main power. BASO does not assume any liability for damages resulting from nonobservance of this rule.
10. Luminous flux and connected electrical load are subject to an initial tolerance of up to +/-10%. Color temperature is subject to a tolerance of up to+/- 150 Kelvin from the nominal value.

FR **Le montage et la maintenance peut être effectuer par specialistes respectant les norms y régles valides. Assurer l'aptitude térmique, mecanique et éléctrique pour l'emploi prevue et assurer la fixage de la luminaire. Éteindre la tension avant de changer les lampes (si applicable) ou avant de realiser travaux (p.ex nettoyage) a la luminaire. Attendre jusqu'à ce que la luminaire et les lampes ont fraichit completement. Merci de bien vouloir vous référer aux notes d'installation du fabricant de la lampe lors de l'insertion, le remplacement et la mise en route, avec des lampes conventionnelles. Pour nettoyer la luminaire utiliser un drap humide et doux. Pour nettoyer les partes du plastique ou les reflecteures on peut utiliser encore un produit de nettoyage sans alcol qui ne fraye pas le material. Garder cette notice de montage pour possibles travaux de maintenance.**

1. La luminaire n' est pas apte pour l'utilizage extrerieur.
2. Utilizer la luminaire seulement avec un dispositif de sécurité
3. Changer immédiatement des verres de sécurité defectes ou bien des écrans de protection.
4. Evitez tout contact de la lampe avec de produits chimiques corrosifs.
5. Nous déclinons toute responsabilité en cas de modifications ultérieures.
6. Des LEDs sont des composants électroniques de haute qualité! Eviter tout contact direct de la surface de sorti de lumiére de la LED avec les mains lors du montage ou des les travaux de maintenance de la lampe.
7. Pour éviter 'endommagement du profil, il est nécessaire de compenser les irrégularités du mur ou du plafond avant le montage des profils. Pour garantir un fonctionnement irréprochable des profils, il ne faut pas déformer les profils lors du montage.
8. La source du luminaire peut être remplace uniquement par le fabricant ou un tiers habilité.
9. Il faut que le circuit de LED soit fermé avant de connecter le convertisseur. BASO ne assume pas la garantie si cette norme ne se respecte pas.
10. La puissance et le flux lumineux affichent d'origine une tolérance de +/-10 %. Tolérance de la couleur de température : +/- 150 Kelvin.

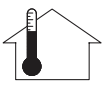
ES **La instalación, la puesta en marcha y el mantenimiento sólo deben realizarse por personal especializado considerando esta guía de instalación y todas las normas y reglamentaciones vigentes. Asegurarse de la aptitud eléctrica, mecánica y térmica de la luminaria para la aplicación prevista y comprobar la fijación segura de la luminaria después desu instalación. Apagar siempre la corriente antes de cambiar la lampara (en caso justificado) o de realizar algún otro trabajo en esta (p.ej. Limpieza). Esperar hasta que se enfrien la luminaria y la lampara completamente. Tener en cuenta las instrucciones de montaje del fabricante al colocar, cambiar y utilizar lamparas convencionales. Para la limpieza dela luminaria utilizar un paño suave y húmedo. Para limpiar componentes de plástico y reflectores puede usar también un limpiador pH neutral y sin alcohol que no roce el material. Guardar esta guía de instalación para trabajos de mantenimiento.**

1. La luminaria noes apta para utilizarla en el exterior.
2. La luminaria solo debe accionar con un dispositivo de seguridad.
3. Cambie de inmediato los vidrios y las tapas de protección dañados.
4. Químicos que tienen efectos corrosivos no deben influir en la luminaria.
5. Para modificaciones futuras en la luminaria no se asume ninguna responsabilidad.
6. Los LED son componentes electrónicos de alta calidad! Por favor durante el montaje o el mantenimiento evite el contacto directo con la superficie de emisión.
7. Para evitar danos en el perfil, los desniveles de las paredes y techos deben ser enrasados antes del montaje de los perfiles. Para garantizar su buen funcionamiento, los perfiles no deben sufrir deformaciones durante el montaje.
8. La fuente luminosa contenida en esta luminaria debe ser reemplazada únicamente por el fabricante o su agente de servicio o similar persona cualificada.
9. El circuito LED debe ser cerrado antes de conectar el convertidor. BASO no asume garantía si esta norma nose respete.
10. La potencia original y el flujo luminoso presentan una tolerancia de +/-10%. Tolerancia de temperatura de color: +/- 150 Kelvin.

The lamp may only be operated with its full protective cover!

L'apparecchio necessita del relativo vetro di protezione!

Sólo usar la luminaria con su cobertura de seguridad completa!



Recommended room temperature: 77 °F.

Temperatura ambiente recomendada: 77 °F.

Température ambiante recommandée: 77 °F.

Don't touch the LED

Use gloves.

Use guantes.

Utiliser des gants.
